

Call for Proposals

Smart Solutions for Adaptable Communities and Cities

****Join Us to Build Resilience for Communities and Cities****

The USAID Private Financing Advisory Network-Asia (USAID PFAN-Asia) is launching a **call for proposal for Smart Solutions for Adaptable Communities and Cities**. These solutions could be anything from apps on clean transport to pilot projects on climate-adaptable housing/buildings, water management, and waste-management.

Selected project developers, technology providers, innovators, and inventors will **receive mentoring support** from USAID PFAN-Asia with an aim to secure funding for upscaling their operations.

Project developers, technology providers, innovators, and inventors should be from the private sector, or be proposed as a public private partnerships, with a planned project in **Bangladesh, Cambodia, India, Indonesia, Laos, Malaysia, Maldives, Nepal, Sri Lanka, the Philippines, Thailand, or Vietnam**, and should be actively seeking capital up to **\$50 million** size range.

Technical Focus: water management, climate-adaptable buildings/housing; climate-adaptable and clean transport; waste management.

Award for Selected Projects:

Selected projects will receive the following support from USAID PFAN-Asia:

- A session of group mentoring.
- Free one-on-one coaching for a total of 10 man-days to develop the business plan.
- Introduction to equity investors and/or debt providers and assistance to negotiate terms of investment/lending.
- Technical assistance (i.e. legal opinion, review of feasibility study and others).

Note: the above support is provided in kind (not cash).

Please email to asia@cti-pfan.net to obtain application document.

Submit your complete application no later than **31 March 2017**
